

Event Vendor Marketplace App Business Plan

Executive Summary

This app connects customers with verified event vendors such as caterers, decorators, MCs, and event planners. It serves as a one-stop platform for planning events seamlessly. Revenue will be generated through commissions, subscriptions, and ads.

Problem Statement

Customers struggle to find reliable vendors, while vendors lack visibility and consistent bookings. Trust issues and lack of centralized platforms make event planning stressful.

Solution

A mobile and web app that allows users to discover, compare, book, and pay verified vendors. Features include reviews, ratings, chat, and secure payments.

Market Opportunity

Nigeria has a thriving event culture with millions of events yearly. The market is large, fragmented, and ready for digital disruption.

Business Model

Revenue streams include commission per booking, vendor subscriptions, featured listings, and service charges.

Product Structure

Customer side: browse, book, and review vendors. Vendor side: manage profiles and bookings. Admin: monitor activities and resolve disputes.

Go-To-Market Strategy

Start in Lagos, onboard vendors, leverage social media marketing, and use referral programs.

Technology Plan

Mobile app (iOS & Android), backend server, cloud hosting, and payment integration.

Financial Plan

Initial costs include development and marketing. Revenue will scale with user growth and vendor onboarding.

Growth Plan

Expand across Nigeria and Africa, introduce AI recommendations, and add event planning tools.

Conclusion

This platform aims to become Africa's leading event marketplace by simplifying event planning and connecting users with trusted vendors.
